

Singer Sewing Machine 7465 Confidence

It's easy to do so much more with the Singer Confidence sewing machines.

The computer technology inside the Confidence models means stitch choice at the touch of a button, ideal stitch length and width are set for you - automatically!

Easy threading, Automatic needle threader, buttonholes at the press of a button and a great choice of stitches, including practical, stretch and decorative stitches. Drop feed enables you to do free motion work such as quilting.

- 50 Built-In Stitches - A large variety of stitches for construction, fashion sewing, quilting, heirloom, crafts, home decorating and decorative sewing, always ensures the perfect stitch for every project.
- 2 Fully Automatic 1-Step Buttonholes - Choose from 2 different 1-step buttonhole styles. Buttonhole sewing is a simple process, providing reliable results. Each side of the buttonhole is sewn in the same direction, creating beautifully balanced buttonholes.
- Direct Stitch Selection - With the simple push of a button you have selected one of 6 popular stitches and the optimum settings for length, width, balance, pressure and tension.
- Built-In Stretch Stitches - Specially designed stitches that add strength and flexibility to seams, especially useful when sewing on knitwear and super-stretch fabrics.
- Adjustable Stitch Length & Width - Optimal settings for length and width are automatically set when choosing a stitch. They can be overridden to personalize length & width choice.
- Centre Zigzag Taper - When tapering with the zigzag stitch, the stitch tapers to the centre, not the left or right. This provides a more attractive look when tapering into or out of a point.
- Stitch Locking Function - Tie-off decorative stitches with just a push of a button. Reinforcing the end of the stitch ensures quality stitching and avoids unravelling.
- Automatic Reverse - Push the conveniently located Automatic Reverse Button to sew in reverse and reinforce the stitch.
- Up to 7mm Stitch Width - Most stitches can be set for a maximum width of 7mm. When sewing decorative stitches or satin stitches, the wide stitches are bolder and more pronounced.
- Electronic Twin Needle Control - Stitches are automatically adjusted for twin needle sewing with just the touch of a button. Twin needle sewing creates two parallel rows, adding a decorative touch.
- 13 Needle Positions - Needle position can be changed for individual projects, such as inserting zippers or cording and topstitching.
- Sewing Speed - With a maximum sewing speed of 750 stitches-per-minute, projects can be sewn quickly.

- 6-Second Threading - Thread a machine in just 6 seconds! No tediously following manual's instruction to thread the machine, just follow the arrows on the machine...and you are threaded in a snap.
- Automatic Needle Threader - After effortlessly threading the machine, this feature automatically threads the eye of the needle!
- Audible Tone - An audible tone confirms pattern and function selection.
- Automatic Tension - This system ensures stable stitch quality, whatever type of fabric is being used.
- Automatic Presser Foot Pressure Control - The amount of pressure exerted on the fabric by the presser foot against the feed dogs is automatic. Sew from the lightest weight tricots to the heaviest denim, without making pressure adjustments.
- DROP & SEW™ Bobbin System - Simply drop in the bobbin, loop the guide and the bobbin is ready—It's that easy!
- Automatic Bobbin Winding Clutch - Needle bar automatically disengages when winding the bobbin, making bobbin winding safer.
- Extra-High Presser Foot Lifter - There are 2 heights to the presser foot lifter. The second height offers more clearance, which is needed when placing multiple layers of bulky fabric under the presser foot.
- 2 STAYBRIGHT™ LED Lights - Not just 1, but 2 lamps illuminate the sewing surface for optimal viewing. The long-lasting bulbs (100,000 hours) stays cool, regardless how long the machine is operated.
- 6-Segment Feeding System - This is a specially designed feed dog that ensures that the fabric is picked up and supported from the front of the presser foot to the rear. This makes for much more accurate feeding.
- Box Feed - This is a feed dog motion that moves the feed dogs in a box motion, rather than the historic arc motion. Box motion assures perfect feeding throughout the entire feed process, as the feed dogs are always in perfect and equal contact with the fabric and presser foot.
- Drop Feed - A conveniently located lever, easily and effortlessly moved, will lower the feed dogs for free-motion embroidery, monograms, and for attaching buttons.
- Heavy Duty Metal Frame - The internal skeleton of the sewing machine. This rigid support holds all the mechanisms in perfect alignment for perfect, skip-free sewing.
- Snap-On Presser Feet - Change from one to another effortlessly with Snap-On feet. No need for screwdrivers to change feet.
- On Board Storage - Storage of accessories in the closed lid conversion table accessory storage area means accessories are always handy.
