Tools Required

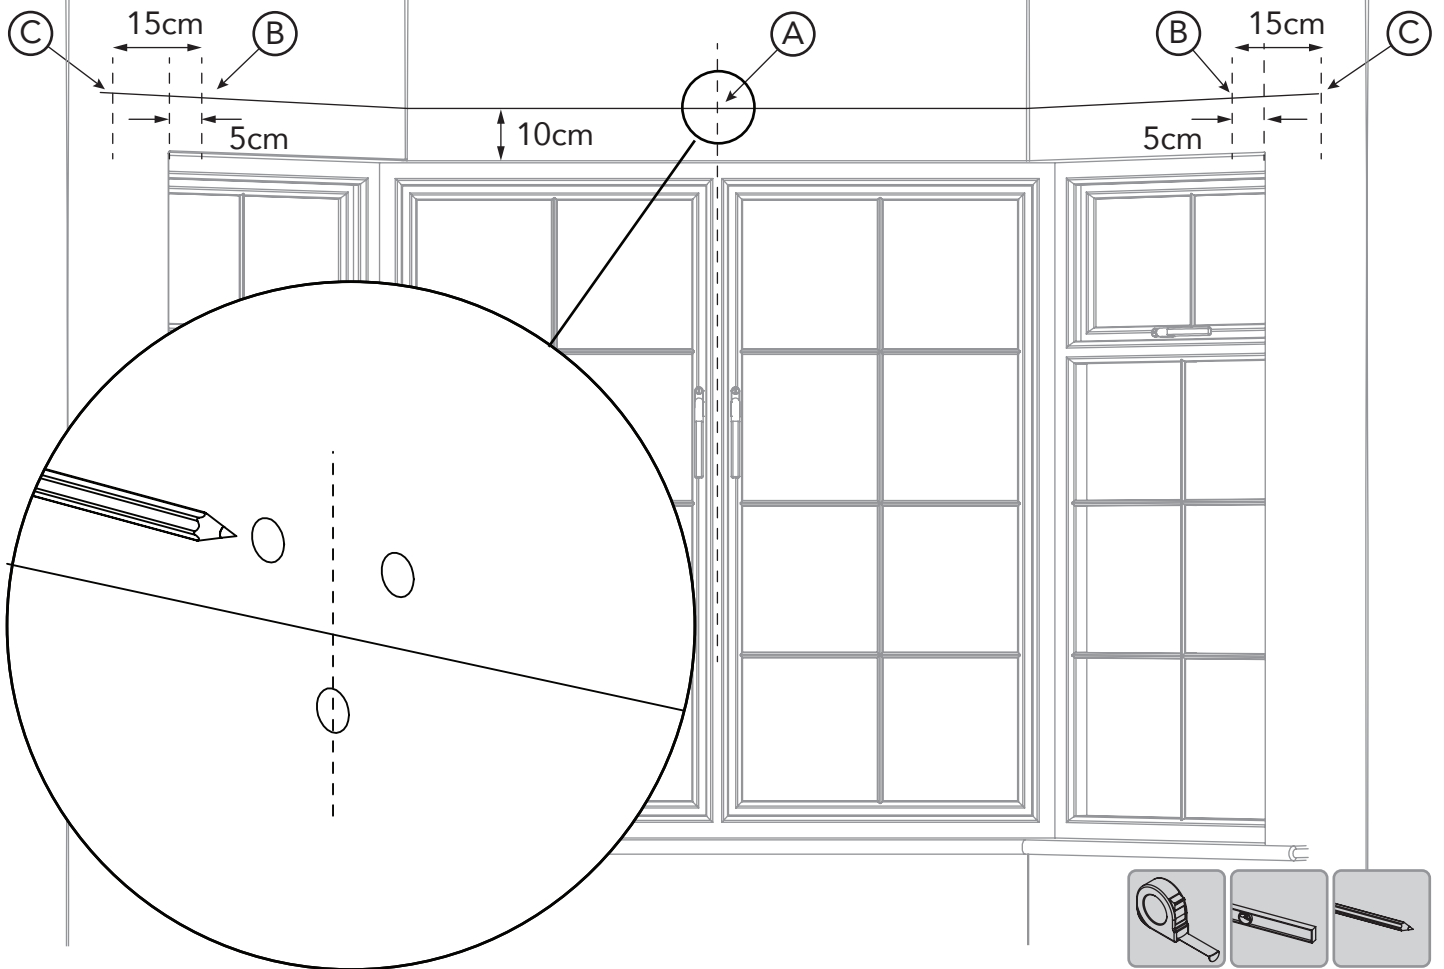

Parts included with Bay Curtain Pole

**PLEASE CHECK PAGE 3
BEFORE PREAPREING TO
BEND THE POLE**

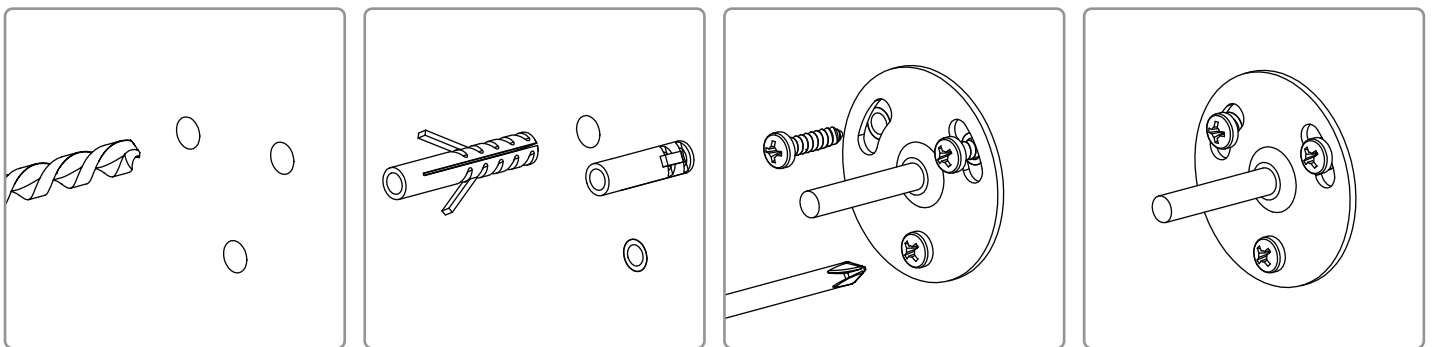

Prepare Wall

Using a tape measure and level, whilst using the wall bracket as a guide, mark the position of the brackets on the wall as shown.

Fit Wall Brackets

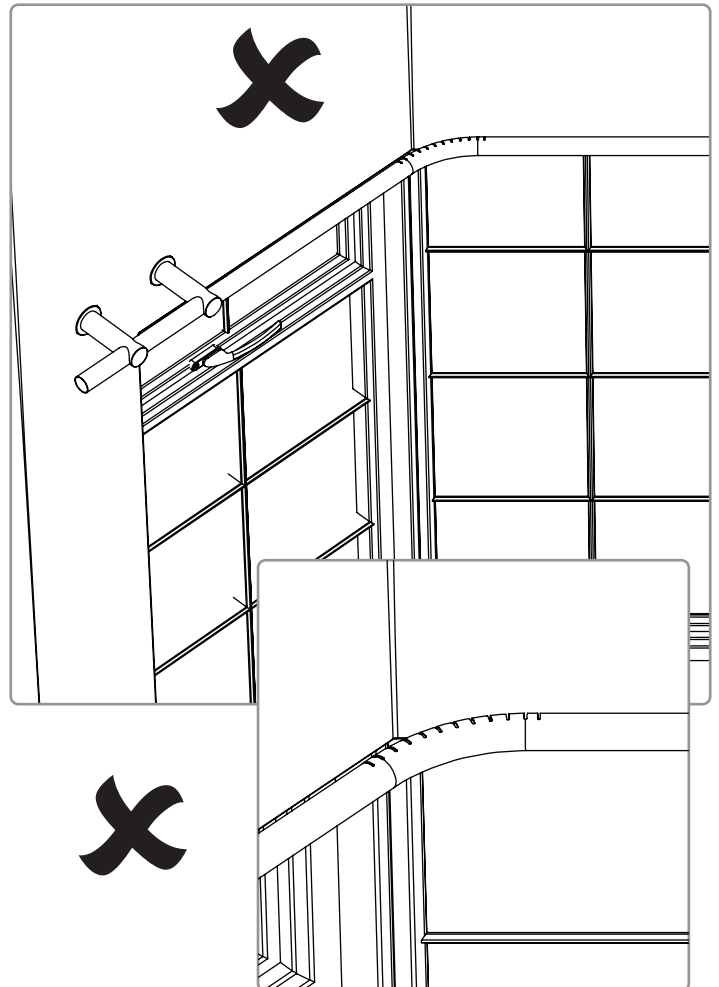

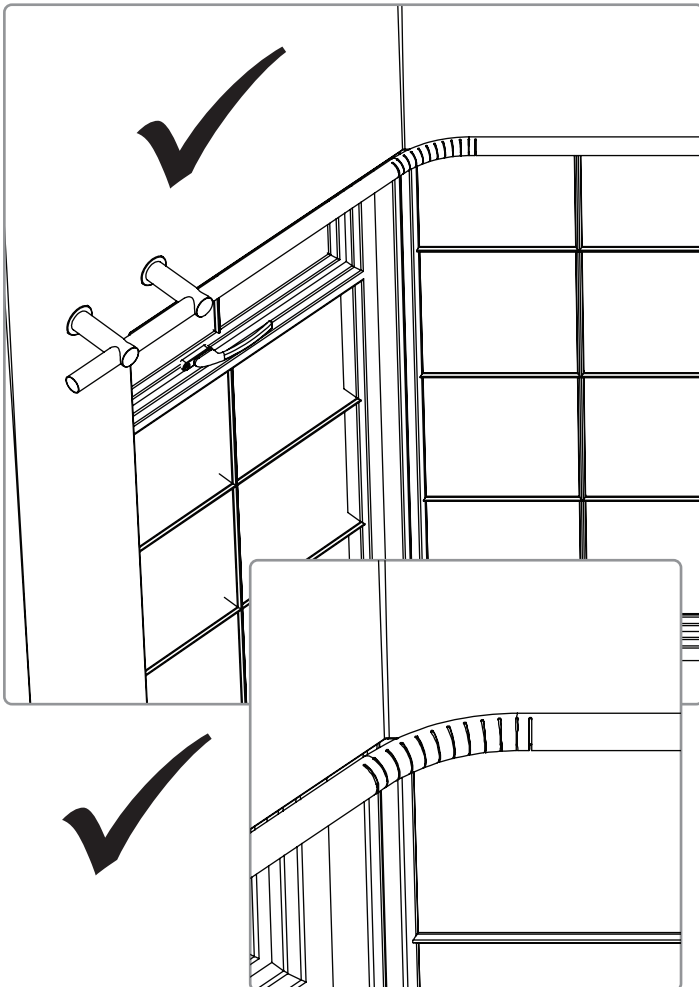

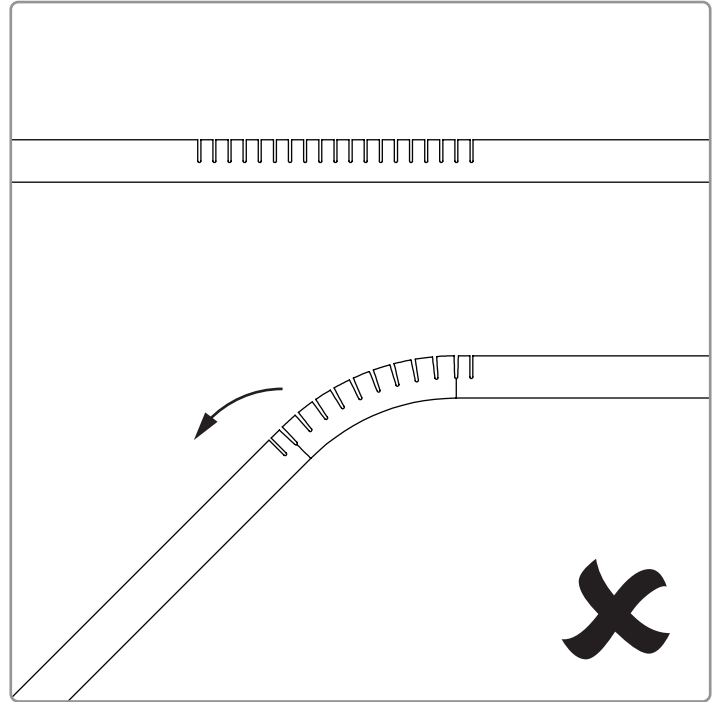

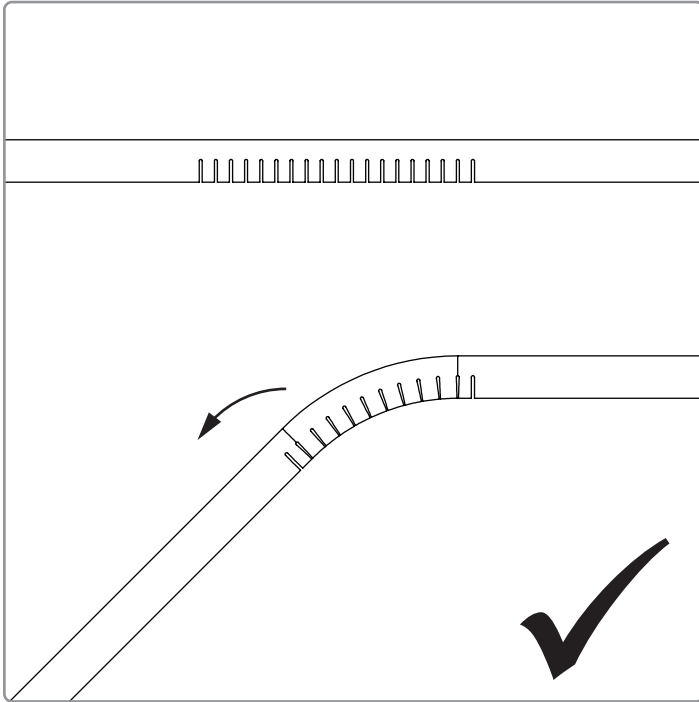

Drill holes in marked positions & fit wall plugs
Screw wall plate to wall

x5

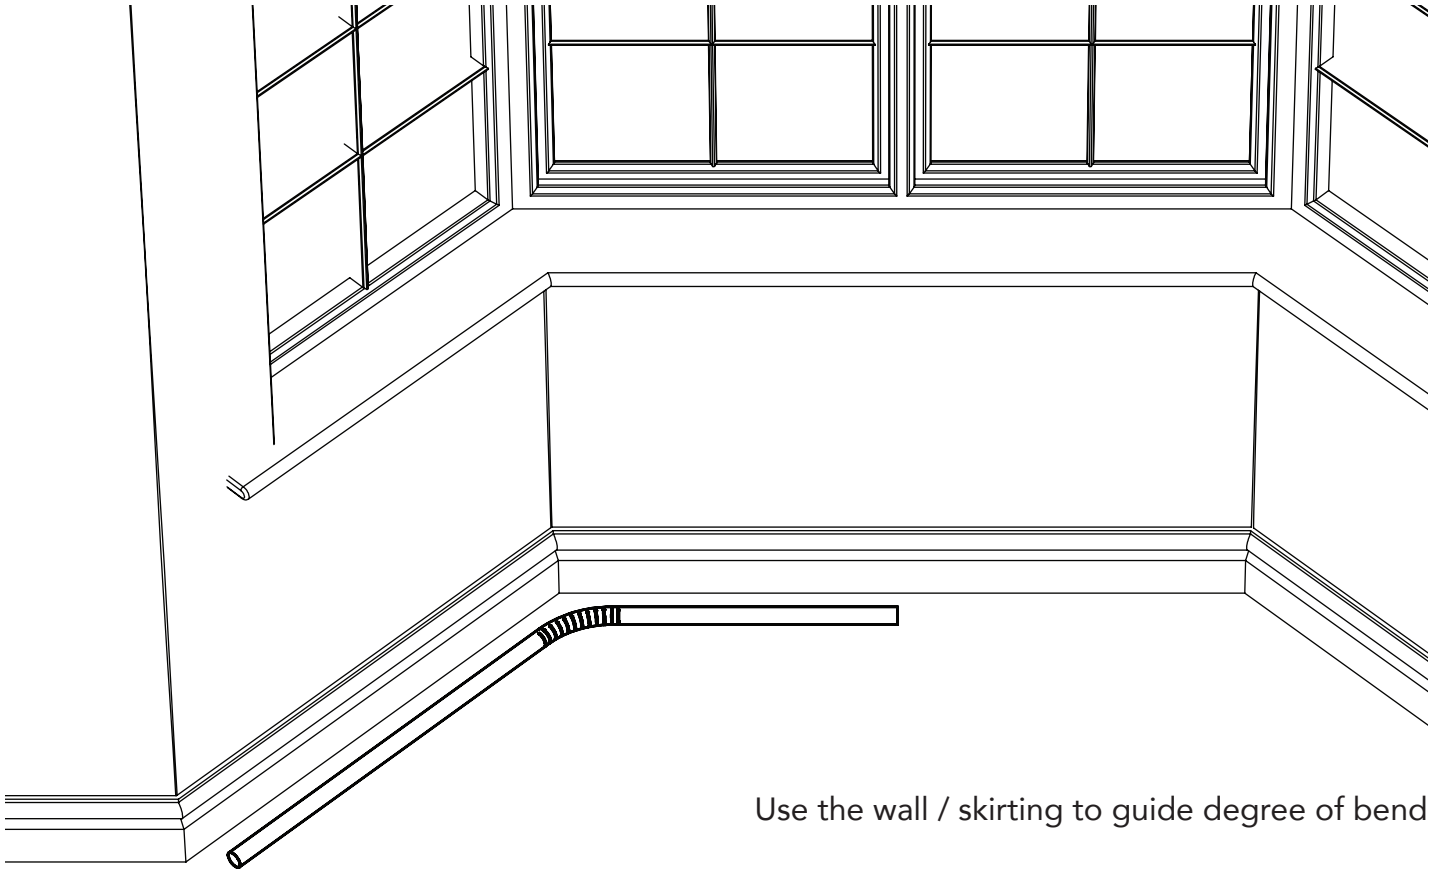

Bend Poles

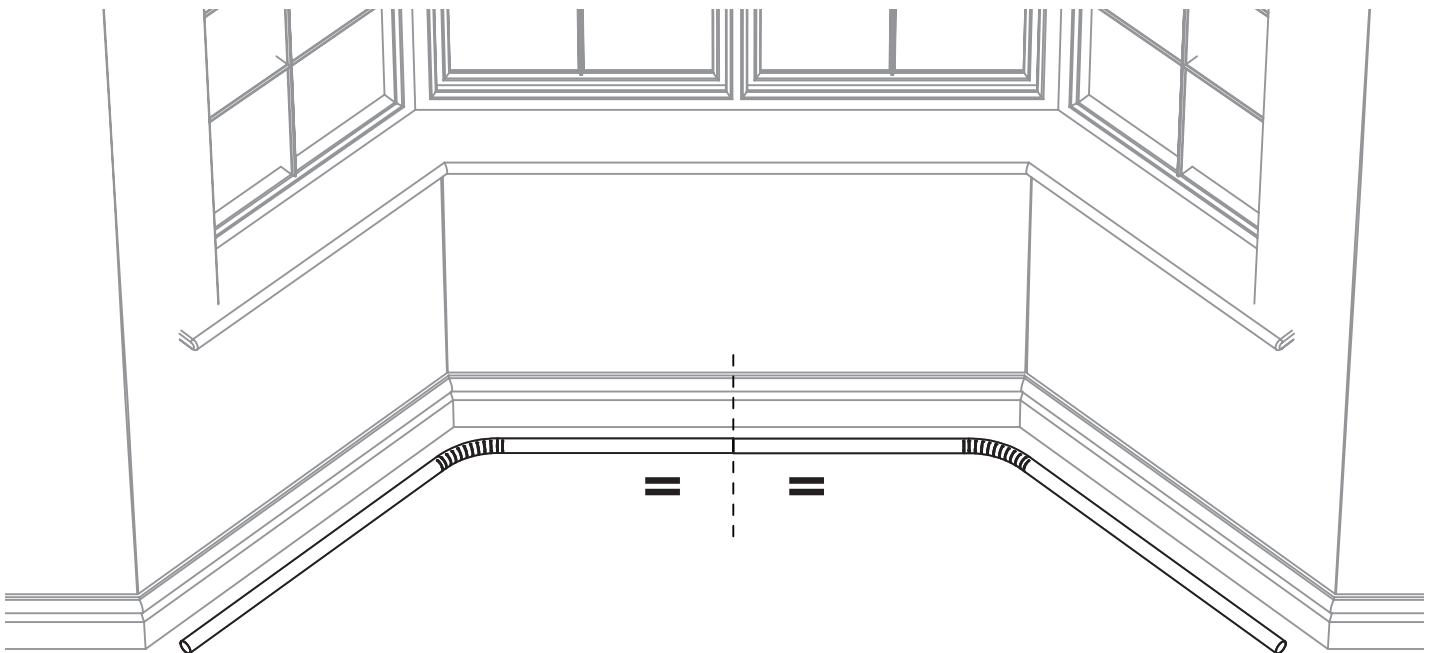

Bend the poles with the slots facing toward the inside of the bend
Use two people to help bend the pole

Bend Poles

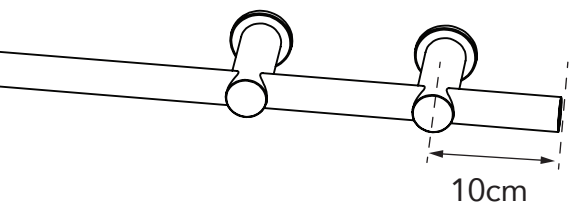

Cut Down Poles

Cut poles to fit window

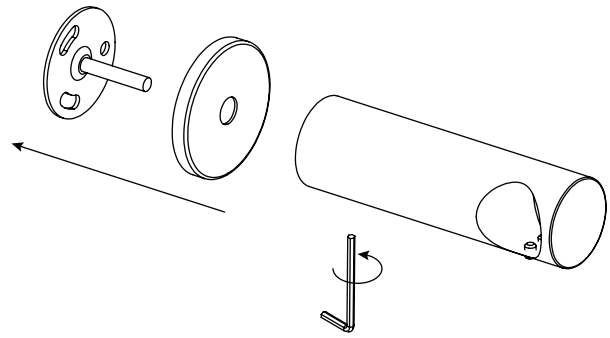

Equal lengths should be cut from each pole to hide join between middle bracket

The outward end of the pole should finish approximately 10cm away from the last bracket

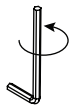

Assembly - Step 1

Fit the centre bracket to the wall in the order shown
Tighten the screw at the bottom rear of the bracket

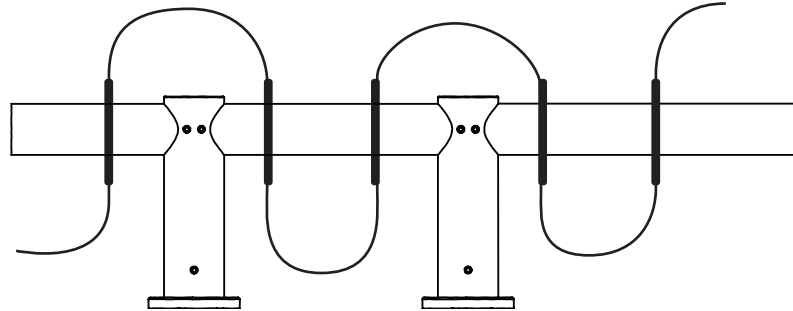

Assembly - Step 2

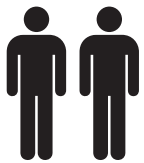

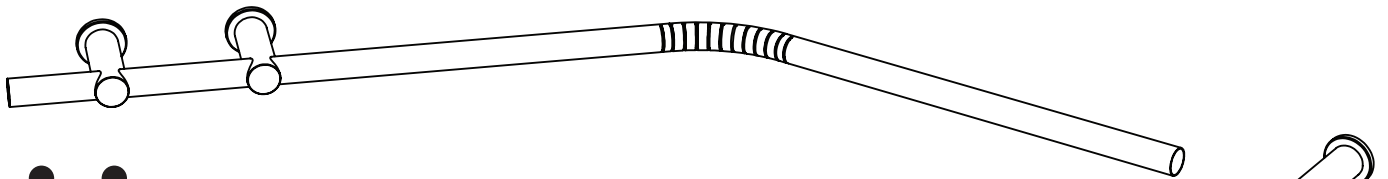

Feed curtain & two brackets onto one section of pole ensuring the brackets do not slide on from middle joint.

DO NOT TIGHTEN SCREWS

Assembly - Step 3

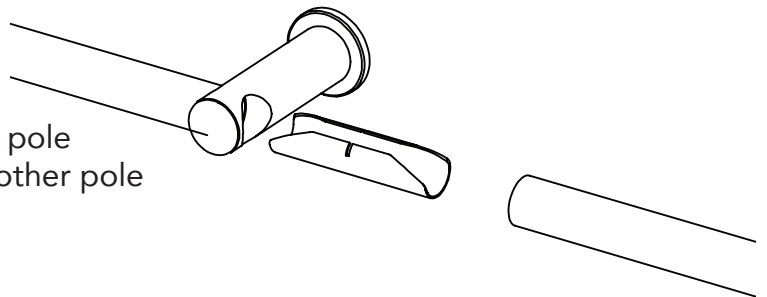

Slide the middle end of the pole into the centre bracket
Fit end brackets in the same order as Step 1
CAUTION - ONLY TIGHTEN THE REAR SCREW!

Assembly - Step 4

Fit Joiner into middle section of pole
Repeat Step 2 & Step 3 for the other pole

Assembly - Step 5

Clip the included level to the pole and tighten all screws ensuring the pole remains level

Assembly - Step 5

Check the function of the pole and correct position if needed.
When everything is correct, slide finials onto the end of the pole and tighten screw.
