Section 2 Hazard Identification

2.1	Hazard Identification **Classification under Regulation (EC) No 1272/2008** This material does not meet the criteria for classification under Regulation (EC) No 1272/2008 **Classification under Directive 1999/45/EC** Hazard symbols: None R52/53, Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Supplemental Information: EUH208, Contains 1-(1,2,3,4,5,6,7,8-Octahydro-2,3,8,8-tetramethyl-2-naphthalenyl)ethanone. May produce an allergic reaction. EUH210, Safety data sheet available on request. Precautionary statements: None Pictograms: None						
2.2	Routes of entry	Inhalation	N	Absorption	Y	Ingestion	Y
2.3	Effects of exposure Ingestion: Ingestion of high doses may cause discomfort and irritation of the gastrointestinal tract and CNS depression (fatigue, dizziness and possibly loss of concentration, with collapse, coma and death in cases of severe over-exposure). Eyes: Slight eye irritant. May be irritating to the skin Skin: May produce skin irritation. Not expected to be a skin absorption hazard. Inhalation: Not expected to be an inhalation hazard.						
2.4	Symptoms of Over exposure Ingestion: NF						

	Eyes: NF Skin: NF Inhalation: NF

Section 4 First Aid Measures

4.1	Frist Aid: Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. For specific information refer to the Emergency Overview in Section 2 of this MSDS. Ingestion: Rinse mouth with water and obtain medical attention. Eyes: Flush immediately with water for at least 15 minutes. Contact physician if symptoms persist. Skin: Remove contaminated clothes. Wash thoroughly with soap and water. Contact physician if irritation persists. Inhalation: Remove from exposure site to fresh air, keep at rest, and obtain medical attention.
4.2	Medical Conditions aggravated by expose: ND

5. Firefighting Measures

5.1	Flashpoint & method: ~>62 °C				
5.2	Auto-ignition Temperature: NA				
5.3	Flammability limits	Lower explosive limit (LEL)	NA	Upper explosive limit (UEL)	NA
5.4	Extinguishing methods: Carbon dioxide, Dry chemical, Foam.				
5.5	Firefighting Procedures: In case of insufficient ventilation, wear suitable respiratory equipment. In case of fire, may be liberated: Carbon monoxide, Unidentified organic compounds.				

Additional information: Heat from fire can generate flammable vapor. When mixed with air and exposed to ignition source, vapors can burn in open or explode if confined. Vapors may be heavier than air. May travel long distances along the ground before igniting and flashing back to vapor source. Fine sprays/mists may be combustible at temperatures below normal flash point. Fight fire from a safe distance/protected location. Heat may build enough pressure to rupture closed containers/spreading fire/increasing risk of burns/injuries. Use water spray/fog for cooling. Avoid frothing/steam explosion. Burning liquid may float on water. Although water soluble, may not be practical to extinguish fire by water dilution. Notify authorities immediately if liquid enters sewer/public waters.

Section 6. Accidental release measures

6.1	Spills: Avoid excessive inhalation of vapours. Contain spillage immediately by use of sand or inert powder. Dispose of according to local regulations.
6.2	Any other forms of release: NF

Section 7. Handling &storage information

7.1	Work & Hygiene practices: ND
7.2	Storage & handling: Keep away from heat, sparks, open flames and hot surfaces. - No smoking. Use personal protective equipment as required. Use in accordance with good manufacturing and industrial hygiene practices. Use in areas with adequate ventilation Do not eat, drink or smoke when using this product. Store in a well-ventilated place. Keep container tightly closed. Keep cool. Ground/bond container and receiving equipment. Use explosion-proof electrical, ventilating and lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge.
7.3	Special precautions: NE
7.4	Additional information: Use in accordance with good manufacturing and industrial hygiene practices.

Section 8. Exposure controls & personal protection

8.1	Ventilation & engineering controls: No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control.
8.2	Respiratory protection: Under normal conditions of use and where adequate ventilation is available to prevent build up of excessive vapour, this material should not require special engineering controls. However, in conditions of high or prolonged use, or high temperature or other conditions which increase exposure, the following engineering controls can be used to minimise

	exposure to personnel: a) Increase ventilation of the area with local exhaust ventilation. b) Personnel can use an approved, appropriately fitted respirator with organic vapour cartridge or canisters and particulate filters. c) Use closed systems for transferring and processing this material. Also refer to Sections 2 and 7.
8.3	Eye protection: Wear protective gloves/eye protection/face protection
8.4	Hand protection: Wear chemical resistant gloves such as: Butyl rubber. or Nitrile. Depending on the conditions of use, protective gloves, apron, boots, head and face protection should be worn.
8.5	Body protection:

Definitions of terms

A large number of abbreviation and acronyms appear on a MSDS. Some of these that are commonly used include the following:

General information	
CAS No.	Chemical abstract service number
Exposure limits in the air	
ACGIH	American conference on governmental industrial hygienists
TLV	Threshold limit value
OSHA	U.S occupational safety and health administration
PEL	Permissible exposure limit
IDLH	Immediately dangerous to life and health
Frist Aid measures	
CPR	Cardiopulmonary resuscitation- method in which a person whose heart has stopped receives manual chest compressions and breathing to circulate blood and provide oxygen to the body.

	Note: The dotted circle indicates that this respiratory protective equipment is required for high concentrations or for large volume spills or releases of product.

Flammability limits in air	
Auto ignition temperature	Minimum temperature required to initiate combustion in air with no other source of ignition.
LEL	Lower explosive limit- lowest percent of vapour in air, by volume that will explode or ignite in the presence of an ignition source.
UEL	Upper explosive limit- highest percent of vapour in air, by volume, that will explode or ignite in the presence of an ignition source.

Other Standard abbreviations:	
NA	Not available
NR	No results

NE	Not established
NF	Not found
ND	Not determined
ML	Maximum limit
SCBA	Self- contained breathing apparatus
